

WE'RE ON IT

WHAT MAKES US TICK?

At Amneon, when we say we're on target, on time, and on budget we'd like you to know that you're on—to something special.

We started our company answering one simple question:

What works? We knew from our experience as an OEM supplier to much larger contract furniture companies how to craft durable, attractive products—products that work.

What we saw that didn't work was how much hassle everyone endured buying contract office furniture. The time and effort it took to sort through, figure out, specify, order and wait for products that still needed a fair amount of noodling around and tweaking before everybody was settled in and working comfortably again.

Or, and maybe even worse, the buy-off-the-floor-somebody's-old-stuff that may or may not be around or adaptable if (surprise of surprises) something happens that requires change.

If you need office furniture, compare everything and compare Amneon. We have years of experience making well made furniture for other companies. We have a small portfolio of products, which helps us keep our costs down and the planning simple. We concentrate on making every buying experience hassle-free.

AMNEON
FURNITURE

ON AMNEON

So we decided to make buying our office furniture work just as beautifully as the furniture.

HOW?

We come to you. We love our customers but we don't want you to have to spend any more time working with us than you have to. We'll come up with a plan that works—for your people, your space and your budget. And we'll do it with you—onsite.

You can stay on top of things. Call or email a real live person right here in Michigan — wearing a full on headset and uniform, just like in the late-night infomercials — with any questions or concerns. (Actually, we don't have headsets, and the only people who wear uniforms are with Security. Everything else is true.)

Our goal is pretty simple: To have you say, after working with us, “Everything should be that easy.”

J.W.Y.N.

Our products philosophy at Amneon is J.W.Y.N. “Just What You Need.” We make, for instance, one system. We make a couple of good task chairs that go great with our system, and a couple of good task lights to light our system. We don't, however, make lamps. Because lamps are individual things, and what you need to run a business, and what your people need to be individuals, are two different things. Your people may want to have a cat-hanging-on-a-toilet-seat poster, or a 365 days of golf calendar, or a T-shirt autographed by a rock band or those little porcelain figurines in their office, which is completely cool with us. This is America, after all. But we aren't going to be making any of those things.
